

MagnaPrint® Bling Range

Ready to use metallic printing pastes

MagnaPrint® Bling is a ready to use metallic print paste that has excellent shine and elasticity. The paste may be pigmented with MagnaPrint® Eco Pigments to achieve different colours such as Bling Gold & Bronze. Recipes are available upon request.

Application

MagnaPrint® Bling should be printed through a 32 - 61 (86 - 156) mesh screen with rectangular profile squeegees. As the particle size is 10 - 60 micron this should be considered when selecting screen mesh.

When printing as part of a multicoloured design print the MagnaPrint® Bling as the last screen to avoid pick up.

After printing the garment/panel should be cured, ideally for 2½ - 3 minutes at 165°C (330°F).
