

MagnaPrint® Crystal Clear Reflective

Ready to use transparent reflective ink

MagnaPrint® Crystal Clear Reflective is a ready to use water-based textile printing ink containing micro glass beads which reflect light.

MagnaPrint® Crystal Clear Reflective can be coloured with MagnaPrint® Eco Pigments and printed directly onto light coloured fabric or a underbase such as AquaFlex V2 for dark fabrics. Alternatively, it can be used as a final overprint on multicoloured designs.

Application

Printing is best undertaken using 24 - 43T (60 - 110) mesh screens with rectangular profile squeegees.

Print MagnaPrint® Crystal Clear Reflective as last colour to avoid pick up. After printing the garment/panel should be cured for 2 - 2½ minutes at 165°C (330°F).
