

MagnaPrint® Emboss

Ready to use printing paste for embossed effects

MagnaPrint® Emboss is a ready to use water-based print paste for achieving an embossed surface to polyester fabrics. The ink is designed to be washed off following use, leaving a raised effect to desired areas of the fabric.

Application

MagnaPrint® Emboss can be printed directly on fabric. Stronger effects can be achieved by using several printing strokes.

Printing is best undertaken using 32 - 43T (80 - 110) mesh screens with rectangular squeegees.

After printing, the fabric should be cured for a minimum of 2 ½ minutes at 165 - 170°C (330 - 340°F). Ideally thoroughly wash the material as soon as possible following curing to remove the ink for the strongest effects.

SPECIFICATION

FABRIC TYPES
Polyester

MESH
32 - 43T (80 - 110)

SQUEEGEE
Medium 65° Shore
Rectangular

STENCIL
Water resistant emulsion

CURE TEMPERATURE
2 ½ minutes at 170°C
(340°F)

STORAGE
In cool place properly closed:
>5°C (40°F) <25°C (77°F)

HEALTH & SAFETY
MSDS available upon request

CLEAN UP
Wash off screen using water and mild detergent
