

## MagnaPrint® Invisible Ink

## **UV Sensitive ink for process / tonal artwork**

MagnaPrint® Invisible ink is a high solids water-based ink which glows bright blue under UV light.

MagnaPrint® Invisible ink has been designed to give excellent print performance and open time on high mesh screens.

MagnaPrint® Invisible ink can be printed as a clear top coat.

## **Application**

Printing is best undertaken using 32 – 77T (86 - 280) mesh screens with rectangular profile squeegees on preheated pallets (70°C / 186°F). If printing large areas flash units may be required after each colour.

Always use 3 - 4mm off contact and print top colours in one stroke to achieve a surface print. After printing the garment/panel should be dried and ideally cured for  $2 - 2^{1/2}$  minutes at  $165^{\circ}$ C ( $330^{\circ}$ F).

## **SPECIFICATION**

**FABRIC TYPES**Cotton / Poly Cotton blends

**MESH** 32 - 77T (86 -280)

**SQUEEGEE**Medium 65° Shore
Rectangular

**STENCIL**Water resistant emulsion

CURE TEMPERATURE 2 - 2½ Minutes at 165°C (330°F)

**ADDITIVES**Softener TS, Retardant Gel

STORAGE

In cool place properly closed: >5°C (40°F) <25°C (77°F)

**HEALTH & SAFETY**MSDS available upon request

**CLEAN UP**Wash off screen using water and mild detergent
