

## MagnaPrint® Softener TS Conc

### Handle and runnability additive

MagnaPrint® Softener TS Conc can be used with MagnaPrint® Bases to improve the handle of the finished print. At the same time, it improves the dry rub-fastness without adversely affecting the wet rub-fastness.

MagnaPrint® Softener TS Conc also improves runnability and prevents drying /choking in the screen without any adverse effect on flash performance of the ink.

### Application

MagnaPrint® Softener TS Conc can be added to any MagnaPrint® base paste at 5 - 20g/kg.

The maximum addition level should not be exceeded as this may adversely affect the printed fabric's wash fastness.

### SPECIFICATION

#### STORAGE

In cool place properly closed:  
>5°C (40°F) <25°C (77°F)

#### HEALTH & SAFETY

MSDS available upon request
